Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-10</u>	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

The claimed invention

The claimed invention relates to a child's bib includes a plastic string which has a free-bearing part that extends from one end of the edge of the neck-surrounding recess of the bib to the front piece thereof and terminating in the proximity of the other end of the edge of said recess, said plastic string having the form of a series of beads that are mutually separated by waist portions. Located at the free end portion of the string is a fastener in the form of a rounded button which includes a notch-like recess that receives the string and that has a restraining element which engages a waist portion situated between two beads in the string. The fastener is slightly undercut so as to be able to hold the string firmly with a limited force.

The following documents have been cited in the International Search Report

D1: FR 2677226 A1
D2: US 6481016 B1
D3: ES 260335/7 A

The documents cited in the International Search Report represent the prior art. The claimed invention stated in claims 1-10 is not considered to be anticipated by these documents. None of the documents or any relevant combination of them reveals a baby bib with a fastener for a bead string as described by these claims.

According to the arguments stated above, the invention claimed in claims 1-10 is novel, considered to involve an inventive step and has industrial applicability.
